DOT Shipping Classification is

195 P (78.5°C)

Solid Carbon Dioxide (Dry Ice) is

MISC.

Usage:

- Place wrapped items on top.
- Use insulating material on top of dry ice.
- Place dry ice in bottom of container.

FOR COOLING

- Dry ice will naturally turn into gas.
- Avoid prolonged exposure to dry ice as it will evaporate.
- Do not store in a freezer or refrigerator unless the power is off, otherwise the
  container will freeze, and the items wrapped in it will be damaged.
- Store in an insulated container.

How to Use

1. Place wrapped items in bottom of container.
2. Use insulating material on top of dry ice.
3. Place dry ice on top.
4. Use ice in a freezer or refrigerator.

COMMERCIAL USE
